

CAREER OPPORTUNITY

Junior Mobile App Developer

Android & iOS | Edvyan SchoolIOS

EMPLOYMENT	LOCATION	EXPERIENCE	MONTHLY SALARY
Full-time	Bengaluru	Fresher / 0-1 year	₹20,000-₹25,000

About the Role

Limora Technologies is looking for a motivated fresher to build and maintain the Edvyan SchoolIOS mobile application for Android and iOS. The selected candidate will create secure, easy-to-use mobile experiences for parents, teachers and school administrators. We prefer a cross-platform developer using Flutter or React Native.

Key Responsibilities

- Develop and maintain the Edvyan mobile application for Android and iOS.
- Convert product requirements and UI designs into responsive, accessible mobile screens.
- Integrate REST APIs, secure authentication and role-based access.
- Build parent and teacher dashboards covering homework, attendance, circulars, fees, notifications and student profiles.
- Implement camera, gallery, file upload and push-notification capabilities.
- Handle loading, empty, offline, permission and error states clearly.
- Test across devices and screen sizes; diagnose crashes, API errors and performance issues.
- Write clean, reusable code and use Git/GitHub for version control.
- Support internal testing and releases through Google Play Console and App Store Connect.
- Protect student, parent and school data by following secure development practices.

Primary Technology Profile

Choose one	Mobile foundations
Flutter + Dart or React Native + JavaScript/TypeScript	REST APIs, JSON, navigation, forms, state management, secure storage, push notifications, Git and debugging

Product Scope

Parents Fees, receipts, homework, circulars and child updates	Teachers Attendance, assignments, notifications and classroom workflows	Schools Secure role-based access, administration and operational visibility
---	--	--

What We Are Looking For

Required Skills

- Working knowledge of Flutter/Dart or React Native/JavaScript/TypeScript.
- Understanding of Android and iOS application development.
- Ability to integrate REST APIs and work with JSON responses.
- Knowledge of navigation, forms, validation and state management.
- Basic familiarity with Android Studio, Xcode and mobile build processes.
- Understanding of local storage, secure token storage and mobile permissions.
- Good debugging, problem-solving and communication skills.
- Willingness to learn quickly and take ownership of assigned modules.

Education

B.E., B.Tech., BCA, MCA, B.Sc. Computer Science, Diploma or an equivalent technical qualification. Freshers with strong practical projects are encouraged to apply; academic percentage is not the primary criterion.

Preferred Skills

- A working college or personal mobile application project.
- Firebase Cloud Messaging or another push-notification service.
- Payment-gateway integration or mobile application security exposure.
- Jest, Flutter Test or another automated testing framework.
- Basic CI/CD, AWS or automated mobile-build knowledge.
- Responsible use of Codex, ChatGPT or Claude while understanding the generated code.
- A project available through GitHub, Play Store or TestFlight.

Candidate Expectations

- Demonstrate at least one working mobile project.
- Learn from technical documentation and feedback.
- Explain all submitted code, including AI-assisted code.
- Communicate progress and blockers clearly.
- Follow coding, testing, privacy and security standards.

Selection Process	What We Offer
1. Profile and project review 2. Basic technical discussion 3. Practical Flutter or React Native task 4. Final discussion	Hands-on product development, mentoring, exposure to APIs, cloud services, notifications and payments, and the opportunity to grow with Edvyan SchoolIOS.
